

Arena & Ground Slot Booking System – Assignment

Duration: 3 hours

Objective

Build a simplified **Arena & Ground Slot Booking System** where users can:

- **Authenticate using Mobile + OTP**
 - Enter mobile number and verify using OTP (mock implementation allowed)
- **Browse Arenas**
 - View list of arenas
 - Filter/search based on:
 - Sport type (e.g., Cricket, Football, Badminton)
 - Location (city/area)
- **Explore Grounds within an Arena**
 - Select an arena to view available grounds/turfs
 - Each ground represents a playable unit (e.g., Turf 1, Court A)
- **Check Slot Availability**
 - Select a ground and date
 - View available time slots for booking
- **Book a Slot**
 - Choose a time slot
 - Enter number of persons
 - Confirm booking
- **View Booking Details via QR Code**
 - Generate a QR code after booking
 - QR should contain booking reference (Booking ID or details)
 - On scanning, user should be able to view booking details

Submission Requirements:

- Push your code to a **Git repository (GitHub)**
- Ensure commits are meaningful and structured

Completion Instructions:

Once completed:

- Share your repository link via email to:
 - Prince Sir – princep@keyconcepts.co.in
 - Ayushi – ayushim@keyconcepts.co.in
